☒ APPROVAL
☐ ESTIMATE
☐ USE

REMARKS: GLDD's subcontracted laboratory for the Type A/B Stone geotechnical testing, Geotesting Express, has submitted an inquiry as to the use of a widely accepted Petrographic Examination method in place of the ASTM method (C295). They state this type of examination is commonly used in evaluation of stone for our specific use. I have attached an email from Geotesting Express accompanied by sample reports that are generated. GLDD is requesting consideration for the substitution of ASTM C295 with this type of Petrographic Examination method.

DISTRIBUTION:

Tim Briggs, GLDD
Tom Cnuddle, GLDD
